Resource Hub

Big company benefits for small companies

Powered by JLABS Partners

Support for small companies comes in many different forms. At Johnson & Johnson Innovation, JLABS we work with external partners to provide a strong community of resources for our residents. This network is strengthened by our internal procurement team who is leveraging the J&J network of external providers, to help deliver benefits that reduces costs, increases access and improves knowledge of the residents.

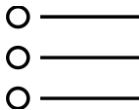

The Resource HUB serves as a key center to connect preferred providers to JLABS companies.

JPALS

Access to expertise, mentorship and connections to support your growth

Powered by Johnson & Johnson experts

JLABS residents and alumni have access to a wealth of Johnson & Johnson internal expertise in pharmaceuticals, medical devices, consumer products and cross sector initiatives through the JPAL program. JPALS provide resident companies with a forum to explore potential areas of partnership within Johnson & Johnson, as well as mentorship, coaching and contacts to support their growth.

230+ JPALS at 40 Locations

Investor Hub

Investors interested in joining the Investor Hub should contact us.

The Future – Powered by JJDC

With the commitment and backing of JJDC, Investor Hubs are launching across all JLABS locations. The power of JJDC is bringing along investors of all types and focuses – unlocking unlimited potential for JLABS portfolio companies. We started with one in Toronto and now have more than 30 investor groups across North America! JJDC will be a physical presence, fostering mentorship and investment for JLABS portfolio companies, bringing along an extensive network of syndicate investors.

JJDC is the strategic venture arm of Johnson & Johnson, they invest across all sectors and at all stages, from seed-level start-ups to Series B and beyond.

Programs

Capacity building and connections for early stage companies

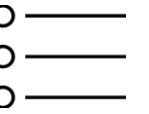

JLABS Programs

Programs at JLABS provide an experience beyond the bench for scientists and entrepreneurs. Our programs allow JLABS residents, alumni, and the innovation ecosystem to make connections and gain valuable insights through workshops, networking events, access to J&J experts, and more. Programs include:

- Funding Series
- Science First
- Educational Workshops
- Health Tech @ JLABS Programming
- Meet with...
- Networking Events
- Community Engagement
- Lunch & Learns

European QuickFire Challenge winner, AlphaBiomics, is developing #microbiome based predictive diagnostic and companion therapeutic products to enable safer and more efficacious drug therapies - bit.ly/2Pmd7ZZ #InsideScoop #JLABSBE #EFRO

MICROBIOME REGULATIONS FROM AN EU START-UP'S PERSPECTIVE

Written by ALB on Friday 9 November 2018 in the category [Insights](#) with the tags [startup](#), [microbiology](#), [regulatory](#).

Interested in the microbiome? So are we! Here's a sneak-peek into S-Biomedic, one of the first microbiome start-ups in Belgium. We asked her to tell us about the challenge of being a new company developing an innovative product in a field where the regulations haven't quite caught up with reality.

A worldly company

As is the case for many European companies, S-Biomedic is an incredibly international organization. The company was founded in Barcelona in 2014 by German scientist Bernhard

Pätzold, Czech manager Veronika Oudova and Spanish scientist Marc Güell. After a stint at a business

Congratulations to JLABS @ BE resident company @syndesi_tx!

Syndesi Therapeutics @syndesi_tx

Very pleased to announce that our lead molecule in development for cognitive impairment, SDI-118, has entered Phase I. . The study includes PET imaging to directly measure the binding of SDI-118 to SV2A in the brain. syndesitherapeutics.com/news

- Have all of the information at your fingertips to be able to connect with them.

<https://jlabs.jnjinnovation.com/JLABSNavigator#/>

The screenshot displays the JLABS Navigator web application interface. At the top, there is a search bar and filter options for 'Current Resident' and 'Alumni'. Below this, a bar chart shows the total number of JLABS companies as 591. To the right, icons represent different sectors: Pharmaceuticals (386), Medical Devices (129), Consumer (76), Cross-Sector (71), and New (25). The main section, 'Explore Companies', features three maps: 'US West & South', 'US Northeast & Canada', and 'Europe'. Each map has colored circles indicating the number of companies in specific regions. Below the maps, there are sections for 'New Companies' and 'Lead Product Stage'. The 'New Companies' section lists Visgenx (dry AMD therapy), AsiaBiome (Microbiome, Live Bio-therapeutics), and Asyilia Diagnostics (diagnostic). The 'Lead Product Stage' section shows a progress bar and counts for Biomarkers (6), Discovery (Research, TI/TV) (131), and Lead (H2L-LO) (63). On the right side, a detailed view for 'VisiPlate' is shown, including its website, location (Philadelphia), and a description of its product: 'Nanoscale drainage implant for open angle glaucoma'. It also lists key personnel: Rui Jing Jiang (Company Contact) and Nicholas Pachuda (Site Head).
