

EMS Software Tool: Realising the Energy Transition

Julian de Lange, Jacob van Rosmalen, Casper Slagt*, Linde Swillens & Mei-Lan Tonneijck

Why?

- Energy Transition
- Paris Agreement and Dutch Climate Legislation
- Companies make promises and ambitions
- EU and Government will **enforce** promises
- Need for **realising** ambitions

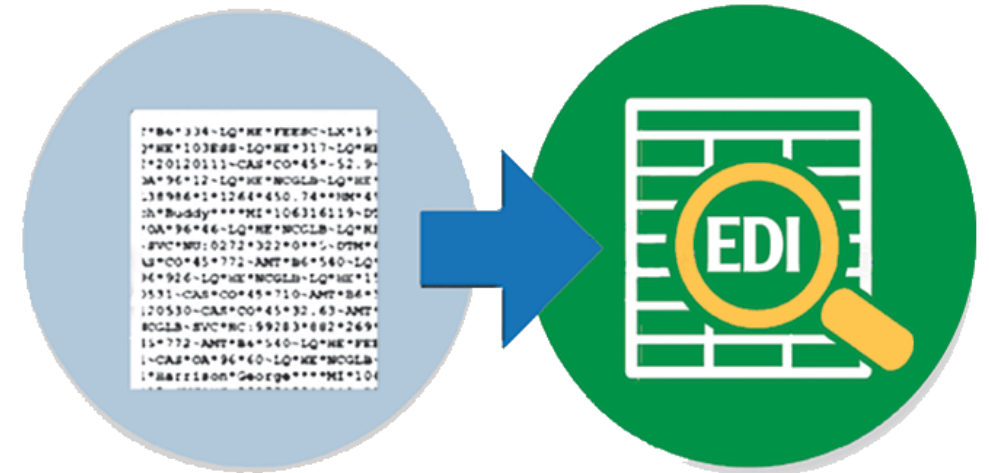

What?

- Our Answer: Energy Management System Software Tool
Gets data, makes analyses, gives concrete savings advice

- Energy Monitoring already mandatory

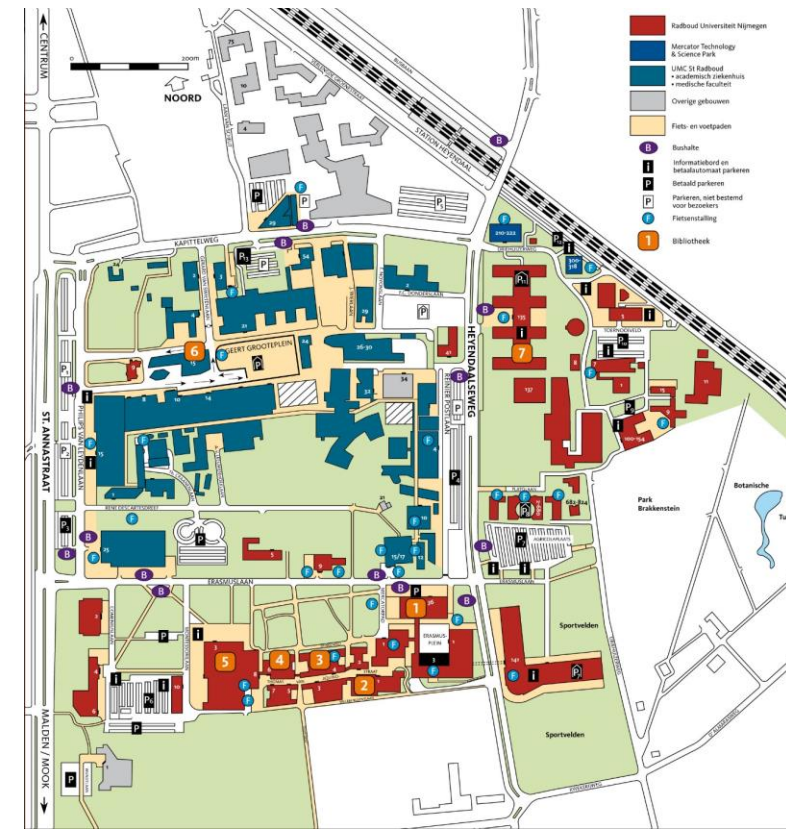

- Our Tool: Monitoring and **Savings**

- Lower energy bills, marketing, and legally prepared: realises your promises

How?

- Expertise: Radboud University (Analytical Chemistry: Chemometrics)
- Test User: Radboud University Faciliatory Department
- Funding: ~1 million euros to develop, patent, and protect
- Business Model: Sell licenses to faciliatory departments

Would you like to invest?

To help realise the energy transition by making companies achieve their climate ambitions.
