Mutual project

Cardiomo Toolkit for Fit4Surgery

This project explores and validates a telehealth solution for patients physically and mentally preparing for surgery at home.

Health data and vital signs are continuously measured by a Cardiomo Patch, converted to meaningful data by CardiomoAI for use by a Health Service Center that remotely services and supports the patient.

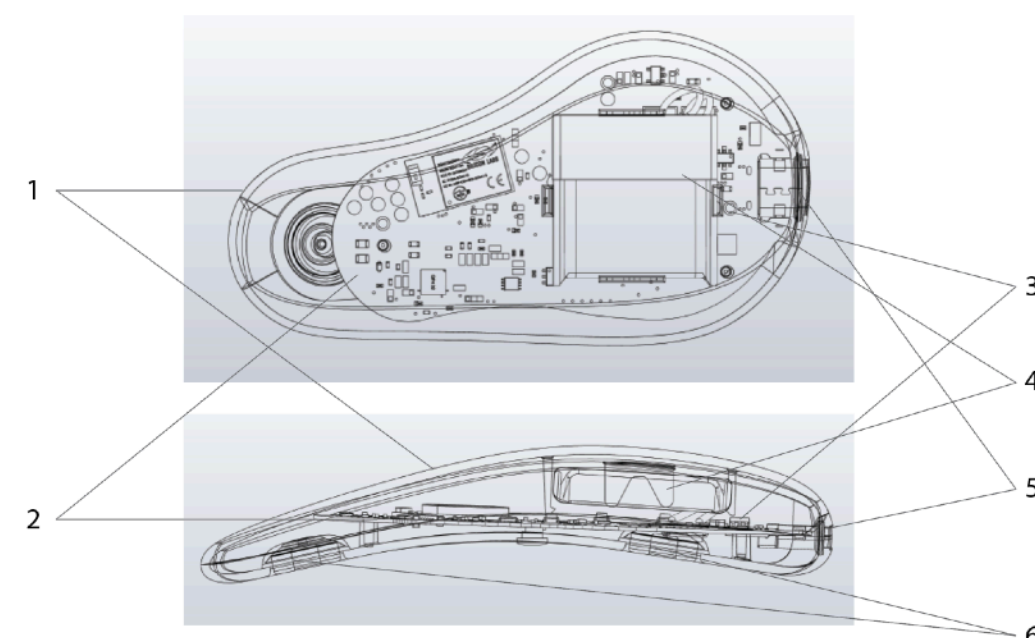

IP and Regulatory Compliance

**Registered Trademark
(international)**

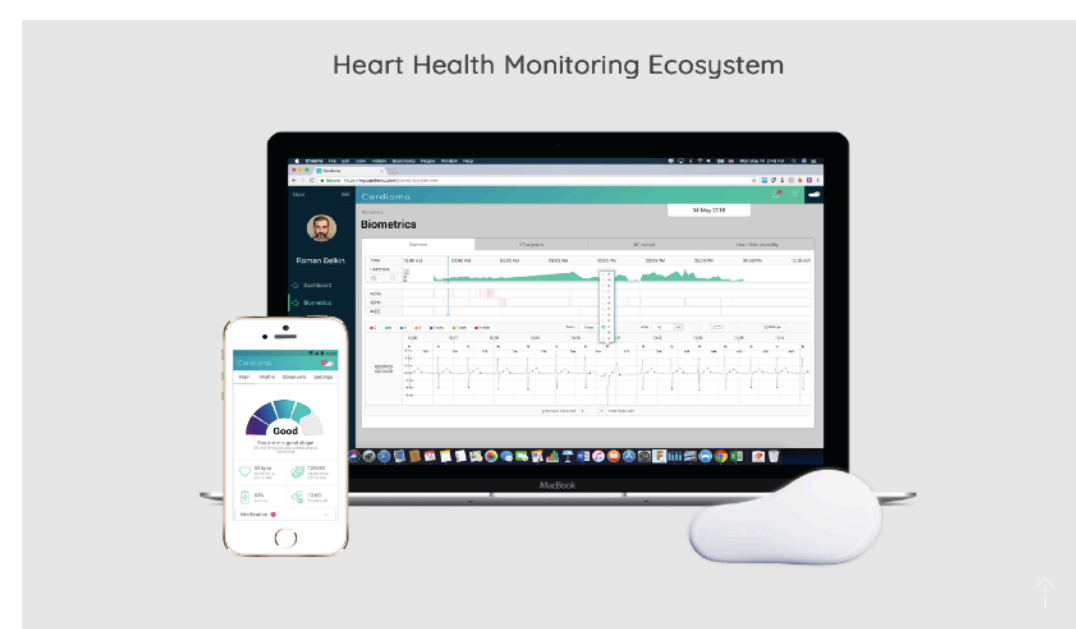

**ISO 13485
QMS of Medical Device**
certified in November 2020
