

The Dutch National Network of Semiconductor companies

Tom van der Dussen
Projectmanager @ Holland Semiconductors

Our Members are our Strength

- A community and strong network of over 75 Dutch based semiconductor companies
- Our goal is to strengthen the Dutch semiconductor sector + the international growth

A close-up, high-magnification photograph of a semiconductor wafer being processed. The wafer is a circular, light-colored disc with a fine grid pattern. A metal probe or tool is positioned above the wafer, and a small amount of blue liquid is visible on its surface. The background is blurred, showing the mechanical components of the equipment.

Our members are present in all parts of the semiconductor value chain:

- IC, MEMS & Sensor Design
- Front-End Development & Production
- Back-End Development & Production
- Assembly & Test
- System Design
- Semiconductor Equipment

We improve the success of our members by supporting:

- Collaborating Initiatives
- Innovation Projects
- Sharing Infra
- Initiate international meetings & webinars

Colaborating Initiatives, Innovation Projects & Sharing Infrastructure

- RF Knowledge Lab
- Minimal Fab
- Groeifonds 'roadmap projects'
- International 'Rocket Reloaded' projects
- ...

A close-up photograph of a microscope's objective lens and stage. The stage is holding a circular semiconductor wafer with a grid pattern. The microscope is positioned above the wafer, and the background is a soft, out-of-focus white.

Internationalization & upcoming Events

- **Mutual presence at Semicon Shows**
Semicon Europa
Semicon Taiwan
Semicon China
Semicon Japan
- **B2B matchmaking**
- **Dutch Sino Center, China**
- ...

Internationalization & upcoming Events

- **Special Topic | Business Development**
September 21, online session
- **Cyber Security | Cyber Game**
September 23, physical meeting
- **Netherlands-Taiwan Semicon Dialogue**
October 14, online session
- **Semicon Europa, Munich**
November 16 - 19
- **Scientific Day**
November 30

Thanks for helping me!

- **Start-up semicon companies to contact?**
- **Which companies or sector needs a low volume of unique computer chips?**
- **Looking for new communications colleague**
