

Cost calculation for clinical trials made easy!

Healex - Studget

Easy & fast full-cost calculations for clinical trials

Why should we do a full cost calculation?

According to the EU-Law 2014/C 198/01

A public Clinic **has to prove** that, in the case of cooperation with commercial partners, all services are provided at market prices!

How to prove it?

- Hardly any collaboration opportunities;
- Choice between flexibility (high susceptibility to errors) or restrictions (few customization options);
- Often enormously complex and not compliant with EU state aid law;
- Can be damaged quickly and must be continuously updated at great expense

The image shows a screenshot of a SAP Data Browser window displaying data from Table T001. The data is organized into columns: MANDT, BUKRS, BUTXT, ORT01, LAND1, WAERS, SPRAS, KTOPL, WAABW, PERIV, KOKFI, and RCOMP. Below this, a Microsoft Excel spreadsheet is overlaid, showing a simplified version of the same data with columns for Client, Company Code, Company Name, City, Country Key, and Currency.

Client	Company Code	Company Name	City	Country Key	Currency
100	1000	BBIL Pvt.Ltd	Hyderabad	IN	INR
100	1001	Test EWM Lager 0100	Berlin	DE	EUR
100	1010	Company Code 1010	Walldorf	DE	EUR
100	1332	VVV Industries Limited	Hyderabad	IN	INR
100	1909	1909	Sandiego	US	USD
100	2010	Company Code 2010	Prague	CZ	CZK
100	2017	Teja Enterprises	Vatcity	IN	INR
100	2019	Teja Enterprises	Vatcity	IN	INR

How to do it differently?

Collaboration

- Different organizational units
- Enable access management for different users?
- Opt-in collaboration at cost calculation level.

Cost catalogs

- Labor / Investment
- Material
- Staff
- Individual cost types

Staff costs

- Supports various hourly rates
- Enables the transfer of cost catalogs

Flexibility

- Supports configurable cost catalogs
- Templates for all types of calculations, up to comply multicenter IITs
- Enable the transfer of cost catalogs and calculations
