
ETHIZIA

Building a product in MedTech

Eric Goossens, site director

Who am I

Since mid 2022 with GATT / J&J

MSc. Chemistry, MEng. Process Engineering

50/50

The journey to launch

GATT Technologies founded by Johan Bender (**General Adhesive Tissue Tape**)

2011–2015

Stop Tape (risks, large clinical trial)

2011

Tape for intestines, with 2-way function (self, tissue)

2016

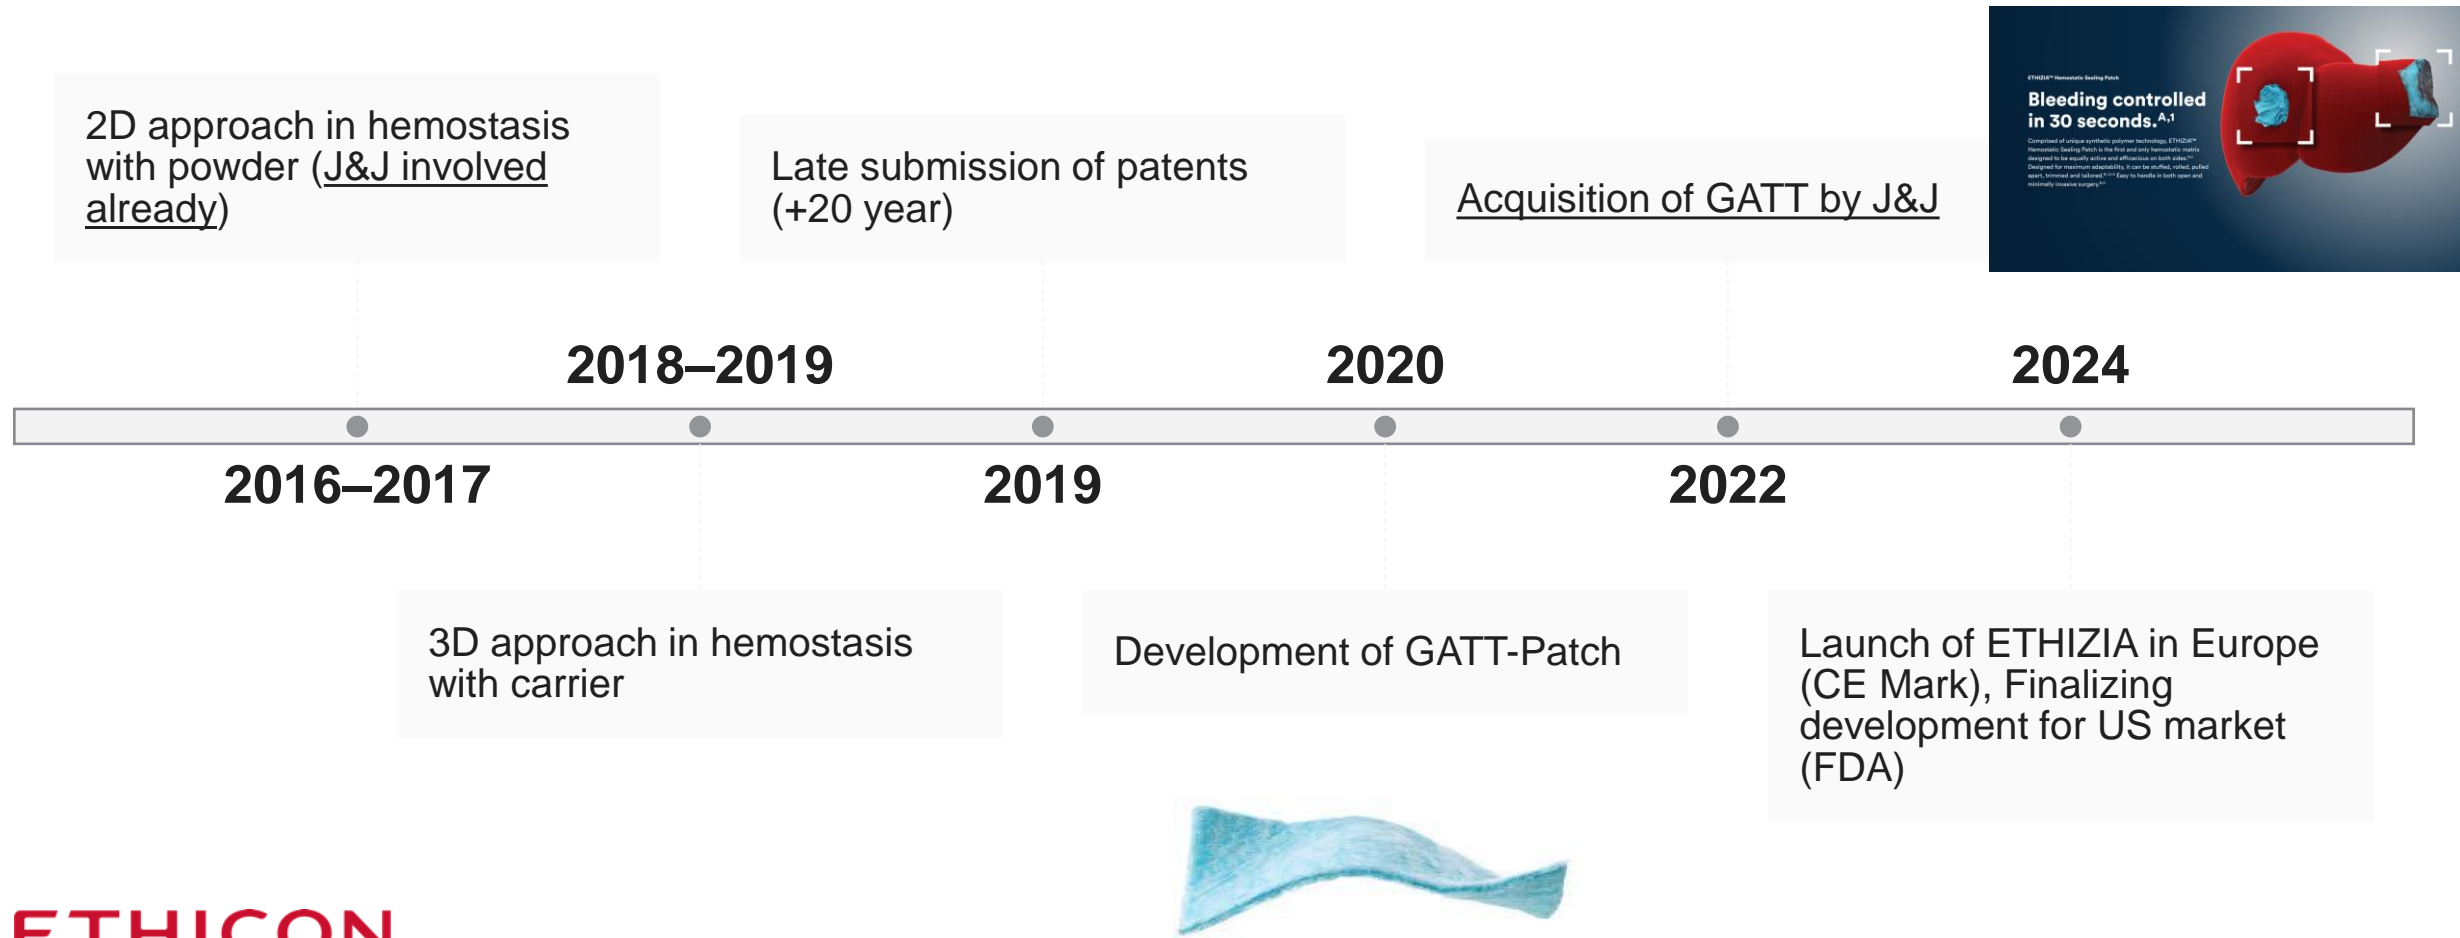

Key for the success in this case:

- Initial financing, a.o. OostNL
- Own developed raw materials / polymers
- Polymers that can be engineered towards tissue adherence

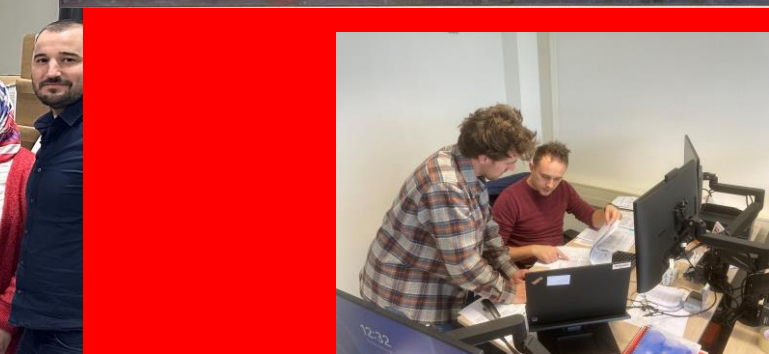

The journey to launch

First ETHIZIA™ batch ready for shipment 04MAR2024

Other perspectives - Dynamics for the team

Scale up processes

Scale up organization

Commercialization with launch in EU (CE Mark)

Preparing for approval and launch in US (FDA)

Integrating with a large Pharma / MedTech corporate (J&J)
